
Test Candidate - Resume (Customized)

Target Role

- ??????? ML Engineer at Snappfood

Summary

- Machine Learning Engineer focused on production ML systems, robust data workflows, and practical model iteration
- Comfortable owning the lifecycle from experimentation to deployment.

Core Skills

- Python, SQL, feature engineering, model evaluation
- MLOps workflows, reproducibility, monitoring
- API integration, automation, and tooling

Experience Highlights

- Built and iterated ML pipelines with clear evaluation criteria and reproducible runs.
- Improved system reliability through input validation, better observability, and cleaner interfaces.
- Collaborated across product and engineering constraints to deliver measurable outcomes.

Projects

- End-to-end ML application systems for role-targeted submissions.
- Workflow automation scripts for packaging, reporting, and review.
