
Project Summary

Opportunity Context

- Role: ML Engineer
- Company: Snappfood
- Relevance: ??? ? | Snappfood

Selected Project Themes

- Productionizing machine learning workflows with clearer interfaces and stronger delivery discipline.
- Turning repeated manual steps into structured automation that improves consistency and reviewability.
- Building tools that balance technical rigor with practical, stakeholder-facing usefulness.

Why The Fit Is Credible

- Lead the end-to-end process of transforming ML models into robust, scalable, and efficient APIs using Python. I
- Exhibit excellent software development skills in Python, including proficiency in writing clean, maintainable co
- Design and implement data pipelines to support ML model training and inference. Experience with database syst
- Experience aligns well with teams that value both technical depth and operational reliability.

Technical Emphasis

- Design and implement data pipelines to support ML model training and inference. Experience with database syst
- Work closely with data scientists, product managers, and other stakeholders to understand requirements, provide

Outcome

- ????? ? ???? ????????? ???? ? ???? ? ???? ??? snappfood.ir
- Demonstrates execution quality, thoughtful packaging, and end-to-end ownership.
