

YOUR NAME ? RESUME (CUSTOMIZED)

=====

TARGET ROLE

=====

? ML Engineer at OpenAI

SUMMARY

=====

? Machine Learning Engineer focused on production ML systems, robust data workflow, practical model iteration.

? Comfortable owning the lifecycle from experimentation to deployment.

CORE SKILLS

=====

? Python, SQL, feature engineering, model evaluation

? MLOps workflows, reproducibility, monitoring

? API integration, automation, and tooling

EXPERIENCE HIGHLIGHTS

=====

? Built and iterated ML pipelines with clear evaluation criteria and reproducible

? Improved system reliability through input validation, better observability, and interfaces.

? Collaborated across product and engineering constraints to deliver measurable outcomes

PROJECTS

=====

? End-to-end ML application systems for role-targeted submissions.

? Workflow automation scripts for packaging, reporting, and review.
