

Mahriar Gharaghani

AI-ML Engineer | Python Developer

Tehran, Iran

1378 / 03 / 17

AI & ML Engineer with hands-on experience across full-stack applications, workflow automations, decision-support systems, and applied AI.

mahriargharaghani@gmail.com | +98 917 397 8579

Portfolio evidence available via GitHub ([GitHub URL](#)) and LinkedIn certifications ([LinkedIn URL](#))

Technical Skills

Languages	Software	AI / ML	Data	MLOps / DevOps
Python	React.js	Machine learning	Analysis (EDA)	Model serving (API)
JavaScript	Express.js	Prompt engineering	Visualization	Docker
TypeScript	Django	LangChain	Preprocessing	Deployment concepts
Markdown	FastAPI	RAG	Feature engineering	Experiment tracking
LaTeX	Databases	Open Calw & N8N	Story telling	Secure implementation of OpenClaw

Education

Degree	Institution	Status / Dates	Description
B.Sc. in Industrial Engineering	Isfahan University of Technology	Completed 2017 - 2023 (1396 - 1402)	graduated
M.Sc. in Engineering Management	Iran University of Science and Technology	In Progress 2023 - 2026 (1402 - 1405)	Thesis: <i>Autonomous Budgeting AI Agent</i> built a Python-based deep reinforcement learning system for project portfolio budget allocation under uncertainty and dynamic financial constraints
Ph.D. Entrance Exam - Computer Engineering (AI and Robotics)	National Universities of Iran	2026(1405) Results Pending	Built a self-engineered preparation pipeline for the national Ph.D. entrance exam with expected Rank 1 performance (ML 80%, DSA 25%, English 90%). Created RAG4Konkur , a local AI study system for flashcard generation, concept review, and AnkiDroid-ready exports, while documenting the broader preparation process on GitHub across data structures and algorithms, machine learning, and pattern recognition .

Professional History

No.	Major Item	Scope
1	Project Control Specialist	Jahanpars Group 2019 - 2020 (1398 - 1399) First professional position while still an undergraduate , during the COVID-19 pandemic.
2	Project Management Officer	Iran Energy Industries Corporation (IEIC) 2023 (1402) Senior deputy to the Head of Department.
3	Career Break - Market Re-entry	2023 (1402) - so far Intentional shift from Management to deep technical engineering, aiming toward designing intelligent systems . - 3.1. Software Engineering: freeCodeCamp Full Stack JavaScript Certifications - (3.1.1.) Responsive Web Design; (3.1.2.) JavaScript Algorithms and Data Structures; (3.1.3.) Front End Development Libraries; (3.1.4.) Data Visualization; (3.1.5.) Relational Database; (3.1.6.) Back End Development and APIs. - 3.2. ML Engineering job prep: (3.2.1.) built an end-to-end house-price ML pipeline; (3.2.2.) implemented a PyTorch CIFAR-10 pipeline with custom loading, augmentation, checkpointing, and ResNet18 transfer learning; (3.2.3.) served a model through a FastAPI REST API; (3.2.4.) containerized deployment with Docker; (3.2.5.) explored CI/CD exposure and MLflow-oriented experiment tracking concepts. - 3.3. Additional AI and passion projects: (3.3.1.) robotic arm reinforcement learning simulation; (3.3.2.) RAG4Konkur, a local LLM study assistant; (3.3.3.) algorithmic trading system experiments; (3.3.4.) live stock candlestick and treemap charts; (3.3.5.) spreadsheet web app; (3.3.6.) logistics heatmap decision-support tool; (3.3.7.) LangChain application system for tailored submission packages.
