
Project Summary

Why This Package Exists

- Provide a concise overview of ML engineering work relevant to ?????? ML Engineer at Snappfood.

Project 1: Application Submission System

- Designed a structured workflow for role-specific application materials.
- Automated generation of markdown artifacts and final delivery bundles.
- Reduced manual handoff time and improved consistency across submissions.

Project 2: Model Workflow Template

- Created reusable conventions for data preparation, training, and evaluation.
- Emphasized reproducibility and clear metrics for decision-making.

Project 3: Deployment Readiness Practices

- Documented practical checks for reliability, logging, and maintainability.
- Focused on production-minded engineering tradeoffs.

Outcome

- Demonstrates practical execution, automation mindset, and end-to-end ownership.
